I am a front end web developer, passionate about learning and development with a desire in acquiring and applying new skills. Eager to tackle complex problems and find a way to maximize user efficiency.

TECHNOLOGIES AND LANGUAGES IN WEB

HTML, CSS, Javascript, Typescript, React, Next JS, Tailwind, Sass, Git, Firebase, Postman, Google Maps, Google Places, Geoapify.

TECHNOLOGIES AND LANGUAGES IN FLUTTER

Flutter, Dart, Riverpod provider, GetX, Hive, GraphQL, dio, Firebase, Git, Google Maps, Google Places,.

EDUCATION

- **B.Eng. Computer Engineering**, University of Ilorin, Ilorin. **2014 – 2019**

WORK EXPERIENCE

- **VOLTIS LABS (FRONT END ENGINEER, FLUTTER, WEB)** **NOV 2024- MAY 2025**

- **KEY RESPONSIBILITIES (Flutter)**

- To develop and deploy Android and iOS Mobile Applications.
- Design Scalable and maintainable Flutter application architectures.
- Choose appropriate state management solutions based on the project requirements.
- Implement best practices for code organisation and modularisation.
- Git version
- Pixel-perfect coding of Figma UI designs.
- Collaborated with cross-functional teams to design and develop intuitive user-centric features
- Real-time communication: Implemented Firebase, messaging, and APIs to deliver timely push notifications, keeping users informed at every step.

Projects Built : Prelura, Outfeatz, Productivity hub, Afrogarm

- **KEY RESPONSIBILITIES (Web)**

- Designing, developing, and maintaining site codebase(s).
- Planning, implementing, optimizing, and expanding the architecture of the codebase
- Testing and evaluating new technologies for seamless usage.
- Improvement of mobile view processes through testing, monitoring, refactoring.
- Git version
- Pixel-perfect coding of Figma UI designs.
- Collaborated with cross-functional teams to design and develop intuitive user-centric features

Projects Built : Voltis Labs, Spinner sonic, Prelura web, Afrogarm, Loyalty bot

- **ZILYCLOUD TECHNOLOGIES (FRONT END ENGINEER)** **SEPT 2024 - NOV 2024**
KEY RESPONSIBILITIES
 - Developed and maintained scalable, responsive front-end applications by translating design concepts into interactive web apps while ensuring user experience.
 - Created visually appealing interfaces using Reactcomponent libraries
 - Collaborated with designers and back-end developers to create intuitive, user-friendly software.
 - Ensured the technical feasibility of UI/UX designs.
 - Optimized application for maximum speed and scalability.
 - Implemented security and data protection measures.
 - Participated in code reviews to maintain code quality and share knowledge with the team.

- **ACME SOFTWARE LAB (FRONT END DEVELOPER INTERN)** **JUN 2024 –AUG 2024**
KEY RESPONSIBILITIES
 - Developed and maintained scalable, responsive front-end applications, translating design concepts into interactive and user-friendly web apps.
 - Collaborated with designers and back-end to ensure seamless integration and intuitive user experience
 - Optimized application for maximum speed, scalability and security.

PROJECTS (WEB)

- **Movie App**
 - Worked upon with Next JS & Typescript
 - Implemented Zustand as the state management , React query for caching, querying and mutations.
 - worked with APIs

- **Invoice App**
 - It is used as a app for sending invoice to your client.
 - worked with APIs.
 - It was worked upon with react- routers and helped me gain knowledge on routing.

- **REST Countries**
 - Worked upon with Next JS & Typescript (firstly with vanilla then react)
 - Gained more knowledge about loading, pagination.
 - worked with APIs

- **Calculator App**
 - It does simple calculation but with more simplification
 - Done with react and self-built libraries to help with the calculation.

- **Bill Splitter App**
 - A responsive web app for calculating and sharing bills among friends,family and others

- **Atm Form App**

- A responsive web app form for atm application form design
- worked with animation and transition to improve user experience.
- **Timer App**
 - A web responsive timer for achieving goals, duties.

PROJECTS (FLUTTER)

- **Aguro App**
 - Mainly for connecting farmers and buyer directly
 - Worked with GetX as state management and routing
- **Book App**
 - An archive of books easily accessible and stored
 - Worked with River pod as provider,
 - worked with APIs
- **Quote App**
 - An archive of famous quotes and the speaker easily accessible and stored
 - Worked with River pod as provider,
 - worked with APIs
 -
- **Calculator App**
 - A truthy app used for calculating bank loans to reveal the hidden values and calculations for bank related loans

STRENGTHS

- Communication Skills
- Web Technologies
- Problem Solver
- Collaborative Team Player
- Quick Learner
