I am a front end web and mobile developer, passionate about learning and development with a desire in acquiring and applying new skills. Eager to tackle complex problems and find a way to maximize user efficiency.

TECHNOLOGIES AND LANGUAGES IN WEB

HTML, CSS, Javascript, Typescript, React, Next JS, Tailwind, Sass, Git, Firebase, Postman, Google Maps, Google Places, Geoapify, Supabase.

TECHNOLOGIES AND LANGUAGES IN FLUTTER

Flutter, Dart, Riverpod, Provider, Bloc, GetX, Hive, GraphQL, dio, Firebase, Git, Google Maps, Google Places,.

EDUCATION

- **B.Eng. Computer Engineering**, University of Ilorin, Ilorin. **2014 – 2019**

WORK EXPERIENCE

- **VOLTIS LABS (FRONT END ENGINEER, FLUTTER, WEB)** **NOV 2024- MAY 2025**

- **KEY RESPONSIBILITIES (Flutter)**

- To develop and deploy Android and iOS Mobile Applications.
- Design Scalable and maintainable Flutter application architectures.
- Choose appropriate state management solutions based on the project requirements.
- Implement best practices for code organisation and modularisation.
- Git version
- Pixel-perfect coding of Figma UI designs.
- Collaborated with cross-functional teams to design and develop intuitive user-centric features
- Real-time communication: Implemented Firebase, messaging, and APIs to deliver timely push notifications, keeping users informed at every step.

Projects Built : Prelura, Outfeatz, Productivity hub, Afrogarm

- **KEY RESPONSIBILITIES (Web)**

- Designing, developing, and maintaining site codebase(s).
- Planning, implementing, optimizing, and expanding the architecture of the codebase
- Testing and evaluating new technologies for seamless usage.
- Improvement of mobile view processes through testing, monitoring, refactoring.
- Git version
- Pixel-perfect coding of Figma UI designs.
- Collaborated with cross-functional teams to design and develop intuitive user-centric features

Projects Built : Voltis Labs, Spinnersonic, Prelura web, Afrogarm, Loyalty bot

- ZILYCLOUD TECHNOLOGIES (FRONT END ENGINEER)** **SEPT 2024 - NOV 2024**
 - KEY RESPONSIBILITIES**
 - Developed and maintained scalable, responsive front-end applications by translating design concepts into interactive web apps while ensuring user experience.
 - Created visually appealing interfaces using Reactcomponent libraries
 - Collaborated with designers and back-end developers to create intuitive, user-friendly software.
 - Ensured the technical feasibility of UI/UX designs.
 - Optimized application for maximum speed and scalability.
 - Implemented security and data protection measures.
 - Participated in code reviews to maintain code quality and share knowledge with the team.
- ACME SOFTWARE LAB (FRONT END DEVELOPER INTERN)** **JUN 2024 –AUG 2024**
 - KEY RESPONSIBILITIES**
 - Developed and maintained scalable, responsive front-end applications, translating design concepts into interactive and user-friendly web apps.
 - Collaborated with designers and back-end to ensure seamless integration and intuitive user experience
 - Optimized application for maximum speed, scalability and security.

PROJECTS (WEB)

- Snippet Manager**
 Live: <https://snippet-manager-rho.vercel.app>
 Stack: Next.js, TypeScript, Supabase, GraphQL
 A full-stack app for organizing and managing code snippets across different languages. Integrated Supabase for authentication and storage, GraphQL for efficient data operations, and added search/filter features for better productivity.
-  **Movie App**
 Live: <https://ayopelumi-moive-app.vercel.app>
 Stack: Next.js, TypeScript, TMDB API
 A responsive movie discovery platform using the TMDB API. Implemented advanced state handling with Zustand and optimized performance using React Query for API caching, mutations, and pagination.
-  **NgBookings Clone**
 Live: <https://ngbookings-interview.vercel.app>
 Stack: Next.js, TypeScript, Shadcn/UI
 A pixel-perfect clone of a booking web platform focused on reusable component architecture. Leveraged Shadcn for consistent UI and implemented advanced UI state and dynamic filtering logic.
-  **My Portfolio**
 Live: <https://ayopelumi.vercel.app>
 Stack: Next.js, TypeScript, Three.js, GSAP

A 3D-animated personal portfolio that showcases web projects, skills, and experience. Used Three.js for 3D visuals and GSAP for animation, improving visual engagement and interaction.

-  **Voltis Lab – Corporate Website**
Live: <https://voltislab.com>
Stack: Next.js
A high-performance, SEO-optimized landing page for a tech company. Implemented animations, optimized assets, and ensured accessibility across all devices.
-  **Afrogarm – Ecommerce Platform**
Live: <https://afrogarm.com>
Stack: Next.js, GraphQL
Built a modern e-commerce front-end for a fashion brand. Used GraphQL to handle product data efficiently and integrated animations to enhance user experience.
- **Moneta – Fintech App**
Live: <https://moneta-psi.vercel.app>
Stack: Next.js
A minimalistic financial dashboard showcasing transactions and budget summaries. Built with clean UI and structured code practices focusing on responsiveness and design clarity.
-  **Flexx – Mini SaaS Dashboard**
Live: <https://flexx-kappa.vercel.app>
Stack: React
Built a React-based business dashboard concept with a clean layout and scalable component logic. Helped improve proficiency in managing UI state across nested routes and cards.
-  **Admin Dashboard**
Live: <https://ayopelumi-admin-dashboard.vercel.app>
Stack: React
An admin panel dashboard for managing user analytics and metrics. Designed custom chart widgets, responsive tables, and role-based access logic.
-  **HooBank Landing Page (Clone)**
Live: <https://ayopelumi-hoo-bank.vercel.app>
Stack: Next.js
A clone of the modern HooBank design. Focused on responsive layout, animated elements, and clean component architecture using TailwindCSS.

PROJECTS (FLUTTER)

- **Aguro App**
 - o Mainly for connecting farmers and buyer directly
 - o Worked with GetX as state management and routing

- **Book App**
 - An archive of books easily accessible and stored
 - Worked with River pod as provider,
 - worked with APIs
- **Quote App**
 - An archive of famous quotes and the speaker easily accessible and stored
 - Worked with River pod as provider,
 - worked with APIs
 -
- **Calculator App**
 - A truthy app used for calculating bank loans to reveal the hidden values and calculations for bank related loans

STRENGTHS

- Communication Skills
- Web Technologies
- Problem Solver
- Collaborative Team Player
- Quick Learner
