I am a front end web developer, passionate about learning and development with a desire in acquiring and applying new skills. Eager to tackle complex problems and find a way to maximize user efficiency.

TECHNOLOGIES AND LANGUAGES

HTML, CSS, Javascript, Typescript, React, Next JS, Tailwind, Sass, Git.

EDUCATION

- **B.Eng. Computer Engineering**, University of Ilorin, Ilorin. 2014 – 2019

PROJECTS

- **Invoice App**
 - It is used as an app for sending invoice to your client.
 - worked with APIs.
 - It was worked upon with react- routers and helped me gain knowledge on routing.
- **REST Countries**
 - Worked upon with Next JS & Typescript (firstly with vanilla then react)
 - Gained more knowledge about loading, pagination.
 - worked with APIs
- **Calculator App**
 - It does simple calculation but with more simplification
 - Done with react and self-built libraries to help with the calculation.
- **Bill Splitter App**
 - A responsive web app for calculating and sharing bills among friends, family and others
- **Atm Form App**
 - A responsive web app form for atm application form design
 - worked with animation and transition to improve user experience.
- **Timer App**
 - A web responsive timer for achieving goals, duties.

STRENGTHS
